The US version of Apple's iTunes Store (pictured) has much wider selection of movies than the UK version does Apple is very close to inking a deal with Fox that will see the studios' entire movie output being made available on iTunes. But after several attempts the page was not opening and showing weird error message. That's simply unfair when you can buy full-length blockbuster movies like Pirates Of The Caribbean: At World's End on the US version. If Apple does make downloadable movies available here, it's likely to be welcome by culture-starved Brits. • The App is freely downloadable • If you have an existing subscription, you can enter the subscription details to get free access on the iPad • If you choose to subscribe, simply select the 3 months, 6 months or 1 year option • Your subscription will automatically renew after each subscription period end, depending on your subscription settings and your credit card would be charged through your iTunes account • You can turn off auto renewal any time from your iTunes account settings (it should be turned off at least 24 hours before the end of the current period) The paid subscription for the magazine would cost \$0.99 for a single issue, \$1.99 for 3 months, \$3.49 for 6 months and \$7.99 for 12 months. The admins boast that the site is constantly updated and that it has no dead links, ensuring that you don't waste your time. By Daniel Westlake A movie soundtrack is one of the most important parts of a film, yet few people know how or where to download them. Apple Insider says Fox is asking for downloads to be priced higher than \$15 - something that Apple has refused to do until now. Richard Greenfield at market analysts Pali Research says the only thing that's holding up the Fox deal are Christmas DVD sales, which Fox obviously doesn't want to dampen. That could put the announcement on online release of movies like the Star Wars series, Borat and Minority Report as early as Tuesday January 15th - the date of Steve Jobs' keynote address at the Macworld Expo in San Francisco. Value-added DVDs The Apple-Fox agreement has been spurred by increased piracy and a desire by studios to sell 'premium priced' DVDs which also include a digital copy of a film that can be watched on devices like iPods. Some of the titles are listed by film, some are listed by composer and others are just listed by title. However, most of the soundtracks that are the easiest to find are mainstream pop songs that have been purchased for the soundtrack, not necessarily from composers who have done movie scores. Therefore user must cancel the subscription before it renews in order to avoid billing of subscription fees for the renewal term to your credit card. BBC Writer's Room The UK is the birthplace of many of television and film's top programming. ALL IT TAKES IS YOUR MAGICAL TOUCH TO ENTER THE MAGIC WORLD! How does The Balarama's iPad Subscription feature work? Last.fm seems to have most music tracks in its database—the challenge comes with finding those tracks. Premium pricing is expected to add \$3 (£1.50) to \$4 (£2) to the cost of a DVD. Pali Research's Greenfield also says that once the Fox deal is done, other Hollywood studios will quickly follow suit. We're hopeful that any announcement in January will also involve territories outside the US. Learn More App Support Privacy Policy Every future best-selling screenwriter knows that in order to write great scripts, you've got to read great scripts. With what may be the biggest database of movie soundtracks online, ArtisDirect.com provides most of these downloads for free (with a fee that must be paid for access to others). However, there are a number of online sites where you can download that amazing movie soundtrack you heard in that film the other day. Subscription will automatically renew unless users opt out of the subscription. 61 per cent of those who took part in a BroadbandChoices.co.uk survey said they'd like to be able to download DVD quality movies, according to the BBC. We'd also expect any digital copy of a movie to be at least Apple TV (720p HD) quality if we're expected to pay a premium for it. The developer does not collect any data from this app.
